

technical intelligence solutions

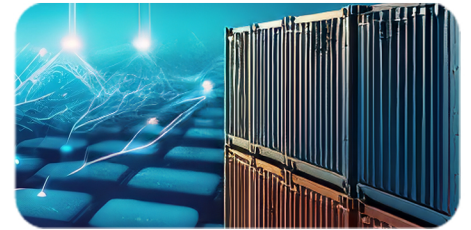

CAPABILITY STATEMENT

SOFTWARE ENGINEERING

- ▶ Full Stack Development (DevSecOps, GitOps, CI/CD)
- ▶ Site Reliability Engineering
- ▶ AI & Machine Learning
- ▶ Big Data Engineering & Insights

INTEGRATION

- ▶ Cloud Orchestration, Integration, & Migration
- ▶ Container Orchestration & Integration
- ▶ Observability Dashboard & Issue Anticipation
- ▶ Cybersecurity Engineering & Zero Trust

SOLUTIONS: THE RIGHT WAY, THE FIRST TIME

- ▶ Our SMEs architect and integrate IaC and other streamlined solutions that have: promoted projects to PoR status, engineered security compliance for ATO, and achieved 99.99% service level capability.
- ▶ At the tactical edge, TIS was commended for engineering quick reaction capabilities that reduce cost and accelerate critical CEM data transfers.
- ▶ Our cloud and container observability stack enables issue anticipation, and reduction of instance expense.

ENGINEERED TO SUPPORT THE WARFIGHTER

- ▶ Founded and run by experienced engineers, we understand the DoD and IC customer's technical requirements, and how to deliver the innovative solutions needed to meet them.
- ▶ We've forged our reputation on projects like GAP, Skope, IMAX-MIT, and Advana, supporting:

LET'S TALK.
